DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 9, drawn to a method of purchasing a customized storage medium, classified in class 705, subclass 26.
- II. Claims 10 - 19, drawn to a system for selectively storing audio and visual recorded material onto a storage medium, classified in 386 class, 96 subclass.
- III. Claim 20, drawn to a method of purchasing recorded material with determining royalty payments due, classified in 705 class, 26 subclass.

Inventions Group I/III and Group II are related as process(s) and apparatus for practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e). In this case, Group II does not require the specific functionality of Group I or Group III. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Inventions Group I and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I has a different function regarding a method of purchasing a customized storage medium. Claim 1 for example, does not require a method of purchasing recorded material with determining royalty payments due to impart patentable distinction to the method recited therein.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Species

In the event the applicant elects Group I above, the applicant is further obligated to elect among the following species as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species of claims 1 and 2 and 5, the method further comprising the step of previewing.

Species of claims 1 and 3 and 5, the method further comprising steps of designing a label, printing the label and printing.

Species of claims 1 and 4 – 5, the method further including a list on the label.

Species of claims 1 and 5 – 7, the method further comprising affixing a magnetic strip to the case with payment selection.

Species of claims 1, 5, 8 and 9 the method further comprising the step of recording data on a data server with payment.

In the event the applicant elects Group II above, the applicant is further obligated to elect among the following species as follows:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species of claims 10 - 14 a system wherein the terminal is communicatively connected to a supply server having recorded material.

Species of claims 10 and 15 - 19 a system wherein the terminal is communicatively connected to a data collection server.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic for Group I and for Group II, claim 10 is the generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
